

**Tasks:**

- 1 Ask pupils to think of one invention to help the remedial (beginners) friends.
- 2 Then, pupils design and label it in the space provided.
- 3 Pupils present their invention and explain its functions.
- 4 They will then exhibit their work.
- 5 Pupils will come and visit other team's work at different stations in the classroom.
- 6 As they walk around, they will write comments or compliments on a sticky note and paste them on the particular stations.

The invention must have the following criteria:

- ☉ User-friendly for beginners.
- ☉ Affordable for all.

Example:

**Simple Hand Fan**

- Functions as a hand fan without the use of electricity.
- Affordable.
- Easy and safe to make.
