

Tasks:

- 1 Teachers will prepare five sets of questions related to the environment.
- 2 Pupils need to form a group consisting of five members.
- 3 Each group will be given a question to answer.
4. Brainstorm the answers together in a group and present the outcome in front of the class.

Examples of questions:

How do you sort unrecyclable items?

What is solar energy? Why is it important?

What is a waste management process?

List down renewable energy.

How do we curb the issue of flooding in Malaysia?
