

Tempoh

- Perlu menambah 1 hari apabila menolak hari terakhir dengan hari pertama.

Tukar Unit Masa

$$\text{JAM} \begin{array}{c} \xleftarrow{\times 60} \\ \xrightarrow{\div 60} \end{array} \text{MINIT}$$

$$\text{HARI} \begin{array}{c} \xleftarrow{\times 24} \\ \xrightarrow{\div 24} \end{array} \text{JAM}$$

$$\text{TAHUN} \begin{array}{c} \xleftarrow{\times 12} \\ \xrightarrow{\div 12} \end{array} \text{BULAN}$$

$$\text{DEKAD} \begin{array}{c} \xleftarrow{\times 10} \\ \xrightarrow{\div 10} \end{array} \text{TAHUN}$$

$$\text{ABAD} \begin{array}{c} \xleftarrow{\times 10} \\ \xrightarrow{\div 10} \end{array} \text{DEKAD}$$

$$\text{ABAD} \begin{array}{c} \xleftarrow{\times 100} \\ \xrightarrow{\div 100} \end{array} \text{TAHUN}$$

Tambah Masa

- Bagi masa yang bernilai pecahan, penyebut perlu disamakan terlebih dahulu.

$$\begin{aligned} 4\frac{3}{5}\text{jam} + 1\frac{1}{3}\text{jam} &= 4\frac{3 \times 3}{5 \times 3}\text{jam} + 1\frac{1 \times 5}{3 \times 5}\text{jam} \\ &= 4\frac{9}{15}\text{jam} + 1\frac{5}{15}\text{jam} \\ &= 5\frac{14}{15}\text{jam} \end{aligned}$$

Tolak Masa

- Perlu berhati-hati apabila meminjam masa, perlu ditukarkan kepada unit yang sama terlebih dahulu.

jam	minit
4	60 + 30 = 90
5	30 ⁴⁰
-	45
4	45

1 jam = 60 minit
